Cleaning Protocol

- High-Density Polyethylene (HDPE) structure
- Non-porous, 100% waterproof and recyclable surface
- Compatible with hospital disinfection protocols
- Resistant to common disinfectants, alcohols, and hospital detergents
- Pre-cleaning: remove visible soiling, then rinse thoroughly with clean water
- Routine cleaning with a neutral or mildly alkaline detergent
- Apply using a microfiber cloth or a soft non-abrasive sponge
- Thorough rinsing after cleaning is recommended
- Compatible with:
  - Diluted bleach solution 0.1–0.5%
  - Ethyl or isopropyl alcohol ≤ 70%
  - Hydrogen peroxide ≤ 30%
  - EN 14885-certified hospital disinfectants
- Recommended contact time: 5 to 15 minutes depending on the product used
- Rinsing is mandatory after the use of chlorine-based or peroxide-based products
- Air dry or wipe dry with a clean, lint-free cloth
- Do not use chlorinated solvents, hydrocarbons, abrasive products, or concentrated acids
- Daily cleaning recommended in healthcare environments
- Disinfection after each patient in psychiatric or secure care environments
- Regular visual inspection of the furniture's integrity after cleaning and maintenance procedures recommended
